

VINCheck Service

Subject: Notice Discontinue VINCheck Service

Please be advised that effective June 12, 2009, CGI's VIN Check product will no longer be offered as part of the Insurance Information suite of products.

VIN Check is a service which identifies branding status of a VIN from 26 registries and police services across Canada.

The decision to remove the VIN Check product from the suite of services is due to lack of widespread participation from our user community and the increased expense to keep the service available online.

We apologize for any inconvenience that you may experience with this cease in service.

Please feel free to contact your CGI representative if you have any concerns or questions.

Sincerely,

Kevin Carroll
CGI
Director
Insurance Information Services
